

VAC-CON

MORE POWER TO YOU

When the water rose, so did Vac-Con!

When one of of Vac-Con's customers came to Vac-Con with a request to make a truck mounted Flood Truck , we responded as we always do,

“What can we do to help?”

Vac-Con used our world renowned hydrostatic drive system to power a 3000 gpm automatic self priming pump system. when roads flood, this unit is quick to respond and quickly clears flooded areas.

We want to know what we can do for you too.

FS3000 FLOOD MACHINE

Hydrostatic Pump Drive

Hydrostatic pump and motor drive using a closed loop Rexroth hydrostatic 125cc piston pump and 125cc bend axis piston motor. Pump is transfer caes / PTO driven

Main 3000 gpm Pump

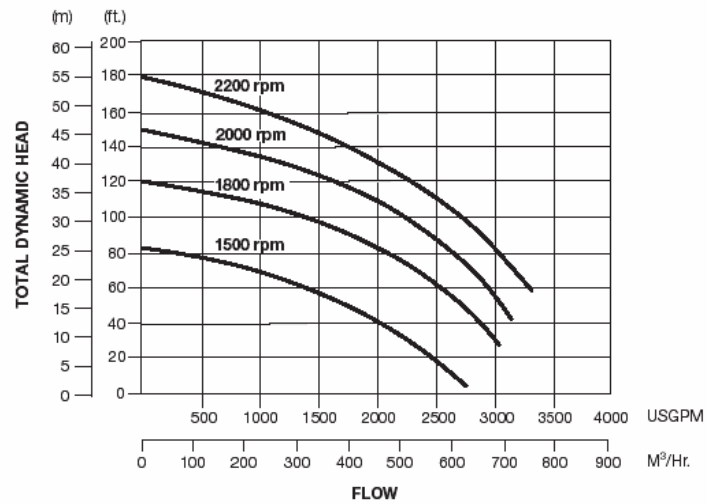

Dri-prime, automatic self-priming up to 28 ft. Eight inch suction and discharge ports will pass solids up to 3-1/8 inches, dry running oil bath bearings with mechanical seals, hydrostatically driven, 11-3/8 in. impellor. Performance specifications: 3000 gpm at 2200 rpm and 80 feet of head pressure, maximum working pressure is 78 psi. Maximum horsepower to 170 bhp to full flow and pressure.

Hydraulic Submersible Pump

Two submersible pumps, 4 inch discharge ports, solids handling to 1-7/8 in, dry running, oil lubricated mechanical seals. Open loop hydraulic driven pump. 500 gpm at 2600 rpm and 75 ft of head pressure. Maximum horsepower is 300 bhp at full flow and pressure.

Two Hydraulic Reels

Two hydraulic reels are used to power submersible pumps, 100 feet of twin line 1/2 inch hydraulic hose with quick disconnect couplings. Variable speed adjustment for oil flow.

Options

Tool Boxes are available for mounting on both sides of the truck.

Arrowboard / Arrowstick

Customer Service/Factory Service/Parts and Training

At Vac-Con, customer service is the #1 priority. Every Vac-Con employee realizes that if the customer has a problem, it has to be solved as fast as possible. No excuses. You don't go through a voicemail service, and your call will be expedited to the individual that can help you. Just call 904.284.4200. The parts department considers an order 'on-time' if it's out the door in 24 hours. Vac-Con's worldwide dealer network is comprised of industry professionals who understand Vac-Con's products and how they meet customer needs.
