

VAC-CON

MORE POWER TO YOU

WIRELESS REMOTE CONTROL

Vac-Con, Inc. offers a wireless remote control system that enables the operator to work the following functions from remote areas (up to 1/2 mile away): chassis engine rpm, boom up, down, right, left, in, & out, automatic vacuum breaker operation, dump controls up, down and hydraulic door locks. An emergency stop button is provided to completely shut down the machine.

The remote system is a skip frequency design that eliminates any type of interference with municipal or military single channel radios, cell phones and other electronic frequency devices.
