

DOES YOUR MACHINE HAVE A HYDROSTATIC BLOWER DRIVE?

SINCE 1991 VAC-CON'S TIME-TESTED, HYDROSTATIC BLOWER DRIVE HAS USED THE GREATER POWER OF THE CHASSIS ENGINE TO HANDLE THE GREATER POWER NEEDS OF THE VACUUM SYSTEM... IT'S JUST COMMON SENSE.

Choosing a Hydrostatic Blower Drive system from Vac-Con also puts you in control of the power where you need it...at the operator's station. There are no complicated, in-cab p.t.o. controls, clutches, gearboxes, couplers, complex sequences to follow or extra steps back and forth. **We don't believe that you should have to work hard to make the machine work hard!**

Ask for a demonstration today, and see for yourself why choosing a Vac-Con means... **More Power to You!**

VAC-CON
MORE POWER TO YOU
